

# Labour Day

Should I join a UNION? Since 2012, the median weekly earnings of full-time wage and salary workers have been larger for Members of Unions than for Non-union workers. 2021 data shows that Hispanic or Latino workers who are members of a union earn an average of \$277 more than those who are not members of a union.

In 2021, the median weekly earnings of full-time wage and salary workers have been larger for Members of Unions than for Non-union workers. 2021 data shows that workers who are members of a union earn an average more than those who are not members of a union. Members of Unions on Protective service, Construction and extraction, Service, and Installation, maintenance, and repair occupations have on average higher earnings than those not affiliated with a union.

Source: US Bureau of Labor Statistics. Current Population Survey 2022.  
Data refer to members of a labor union or an employee association similar to a union and to workers who are neither members of a union nor represented by a union on their job. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Data refer to the sole or principal job of full-time wage and salary workers. All self-employed workers are excluded, both those with incorporated businesses and those with unincorporated businesses. Updated population controls are introduced annually with the release of January data. Effective with January 2020 data, occupations reflect the introduction of the 2018 Census occupational classification system, derived from the 2018 Standard Occupational Classification (SOC).
